Sin - As you have passed our "Civic Fath-

as" over to "Nick," who, last week faith olly discharged his daty of "Grumbler" at al an institutions, which required pruning, whethr meient or modern, fixed or moveable, would like to call his attention to one of our institutions which would be the better of a little s bring up -- I mean our " Board of Common School Trustees." I was told some time ago by one of the " Board," that the present School a commudation was not sufficient for the num ber of pupils in attendance, and consequently he junior portion of the school were not supalied with the proper amount of space neces sary for the management of the business of the -chool, and requisite for the health of both teacher and scholar. I also understood that the teachers had called the attention of the "Board" to the matter and pointed out to them the un uitab eness and insufficiency of the room in which the assistant leacher has to labor.

Now I would like to know if the subject has received the consideration of the Board, It is one which ought to be attended to; and if th Board has not taken retion in the matter they ought to do it without unnecessary delay; and if they find thomselves unequal to the task, would respectfully suggest to them the propriety of handing it over to the good common sense of the Ratepayets, who, I have no doubt would give the matter due consideration. All are how loudly we complain ourselves when compelled to remain in an ill ventilated room for an hour or two: and still knowing this we allow our children, young in years, to be browded into a school room in no way adapted for the purpose, being ill ventilated, poorly scated and much too small. Car we expect our school to 10 become effective if we deny the teachers the properly seat and classify their pupils. Now ! consider the path of duty which the Board ought to pursue is quite plain. I have not heard one question the need of additional accompatation. If the room is not sufficient provide one with all possible dispatch before the seeds of innumerable diseases, are sown in our children by the carelessness and inability, or unwillingness of those in whom the people have reposed confidence chough to make them the guardians of their educational affairs. I say again I have not heard any person question the want of accommodation; but some differ as to the time. I can not see any advantage to be gained by ment, the subject of free schools for Lower and flour have been dull, with rather easier delay in any matter, more especially in this | Canada. one, where the health of our children are at stake. Perhaps the Board will condescend to enlighten the ratepayers on the subjects, and then we will better understand the true position of affairs. If you have space in your paper for the above, by inserting it you will A RATEPAYER. Newmarket, 24th April, 1858."

wish a south A.J. WHEELS C. - ON 1.1. 150 Legodel Street Now York. ROOT PILLS, bas spont the greater part of his life in travelling, having visited Enrope, Asia, and Africa'es well as North Americahas spent third years among the Indians of our Western country-it was in this way that the Indian Root Pills, were first this overed. Dr. Morse was the first man le establish the fact that all deesees area from IMPURITY OF life depends upon this vital fluid.

When the various passages becomes clogged, and do lot not in perfect farmony with the different functions of the body, the blood lodies its action, becomes thick, corrupted and dis-eased; thus causing all pains, sickness and distress of every name; connistrength is exhausted, our health we are deprived of and if nature is not assisted in throwing off the stagnant humors, the blood will become cheked HE Undersigned respectfully intimates to the and cease to not, and thus our light of life will inhabitants of Newmarket and surrounding forever be plique out. How important then country that he has Removed to the premises lately that we should keep the various passages of the body free and open. And how pleasant to us that we have it in our power-to put a medicine in your reach, namely, Morse's Indian Root Pills, manufactured from plants and roots which grow around the mountainous cliffs in Nature's garden, for the health and recovery of diseased man. One of the roots from which these Pills are made is a Sudoritie, which opens the pores of the skin, and assists Nature in throwing out the finer parts of the corruption within. The second is an Expectorant, and opens and uncloze the passage to the lungs, and thos, in a southing mannor, performs its day by throwing off phiegm, and other humors from the lungs May tf-11 by copious spitting. The third is a Diuretic. which gives ease and double strength footlie kidneys; thus encouraged, they draw large amounts of impurity from the blood, which is then thrown out bountifully by the minary for water passage, and which could not have been lischarged he any other why. The fourth is a Carbartie, and accompanies the other properties of the Pills while engaged in purifying the blood the coarser particles of impurity taken by und conveyed off in greater quantities by the bowels at it

From the allove, it is shown that Dr. Morse's Indian Root Pills not only enter the stomach. but becomes quited with the blood, for they find way to every part, and completely rout ont and cleanse the system from all impurity and the life of the body, which is the bloods becomes perfectly healthy; consequently al, sickness and pain is driven from the system, for they cannot remain when the body becomes so pure and clear. The reason why people are so distressed

when sick, and why so many die, is because

they do not got a medicine which will pass to the afflicted parts, bud which will open the natural passages for the disease to be cast out; hence, a large quantity of food and other matter is lodged, and the stomach and intestines are literally overflowing with the correpted mass; thus undergoing disagreeable fermentation, constantly mixing with the blood, which throws the corrupted matter through every vein and artery putil life is taken from the body by disense. Dr. Morse's PILLS have added to themsolves victory upon victory, by restoring millions of the sick to blooming health and hapiness. Yes, thousands who have been tacked or to:mented with sickness, pain and anguish, and whose feeble frames have been scorched by the burning olements of raging fever, and who have been brought, as it were, within a step of the silent grave, how stand ready to testify that they would have been numbered with the dead, had it not been for this great and wonderful medicine, Morse's Indian Root Pills. After one or two doses had been taken. they were astonished, and absolutely surprised, in witnessing their charming effects. Not only do they give immediate case and strength, and take away all sickness, pain and noguish, but they at coce go to work at the loundation of the disease, which is the blood. Therefore, it will to shown, especially by those, who use these Palls, that they will so cleanse and purify, that disease-that deadly enemy-will take its flight, and the flush of youth and beamy will, again return, and the prospect of a long and happy-life will cherish and brighten your days. signature of A.
